This book shows how, despite Einstein's errors in the details, the successful GEM Unification Theory is built on his basic hypothesis that gravity and electromagnetic forces could be unified, and that both controlled gravity and a new view of the cosmos follow: hydrogen, the basic building block of the universe, can be unified with the vacuum itself! The universe is self-renewing, a sort of ...

1 Einstein’s Vision: Unifying Gravity and Electromagnetism (gEM) Einstein devoted the last half of his life to trying to unify gravity and electromagnetism.

## **1 Einstein’s Vision: Unifying Gravity and Electromagnetism**

The basic arguments and results of the gravity-electromagnetism (GEM) theory are presented. This theory unifies gravity and electromagnetism using simple models and concepts and is based on two ...

Instead of an antisymmetric field strength tensor, Einstein used a symmetric tensor. There is a precedence for transforming mathematical structures between gravity and electromagnetism. The method. The process of transforming mathematical structures from electromagnetism to gravity will be continued. Specifically, the gravitational analog to the Lorentz force will be written, as well as the gravitational analog to the classic electromagnetic Lagrangian.

## **gEM: Unifying gravity, electricity, and magnetism by analogy**

The GEM (Gravity Electro-Magnetism), theory is presented as an alloy of Sakharov and Kaluza-Klein approaches to field unification. GEM uses the concept of gravity fields as Poynting fields to postulate that the non-metric portion of the EM stress tensor becomes the metric tensor in strong fields leading to “self-censorship”.

Unified Theory of Force Fields (Electromagnetic and Gravitational) Author: Chaykin Andrey Subject: In this paper, the superfluid substance is described by the same equations of the electromagnetic field and the gravitational field. The gravitational mass is sufficiently considered as the gravitational charge, having the same dimensions as electric charge. Keywords: Gravity, Electromagnetic ...

Unified Theory of Force Fields (Electromagnetic and Gravitational) ... The density thread is the gravity potential. Electromagnetic waves are caused by disturbances of the electromagnetic field and produced by the accelerated motion of charged particles, and gravitational waves are caused by the same accelerated motion of mass (the gravitational charge). Gravitational waves are generated by ...
